

AUSTRALIAN EXPERTISE. GLOBAL STRENGTH.

With ACEN Australia, **more is possible.**

We believe in a more **sustainable**,
inclusive and **resilient** world where we all
have access to **affordable renewable
energy**.

ACEN Australia is ACEN's
renewable energy business in
Australia, developing, building and
operating renewable energy
projects across the country.

With 140+ team members
and growing, our people are
based in Tasmania, Victoria,
New South Wales,
Queensland, and ACT.

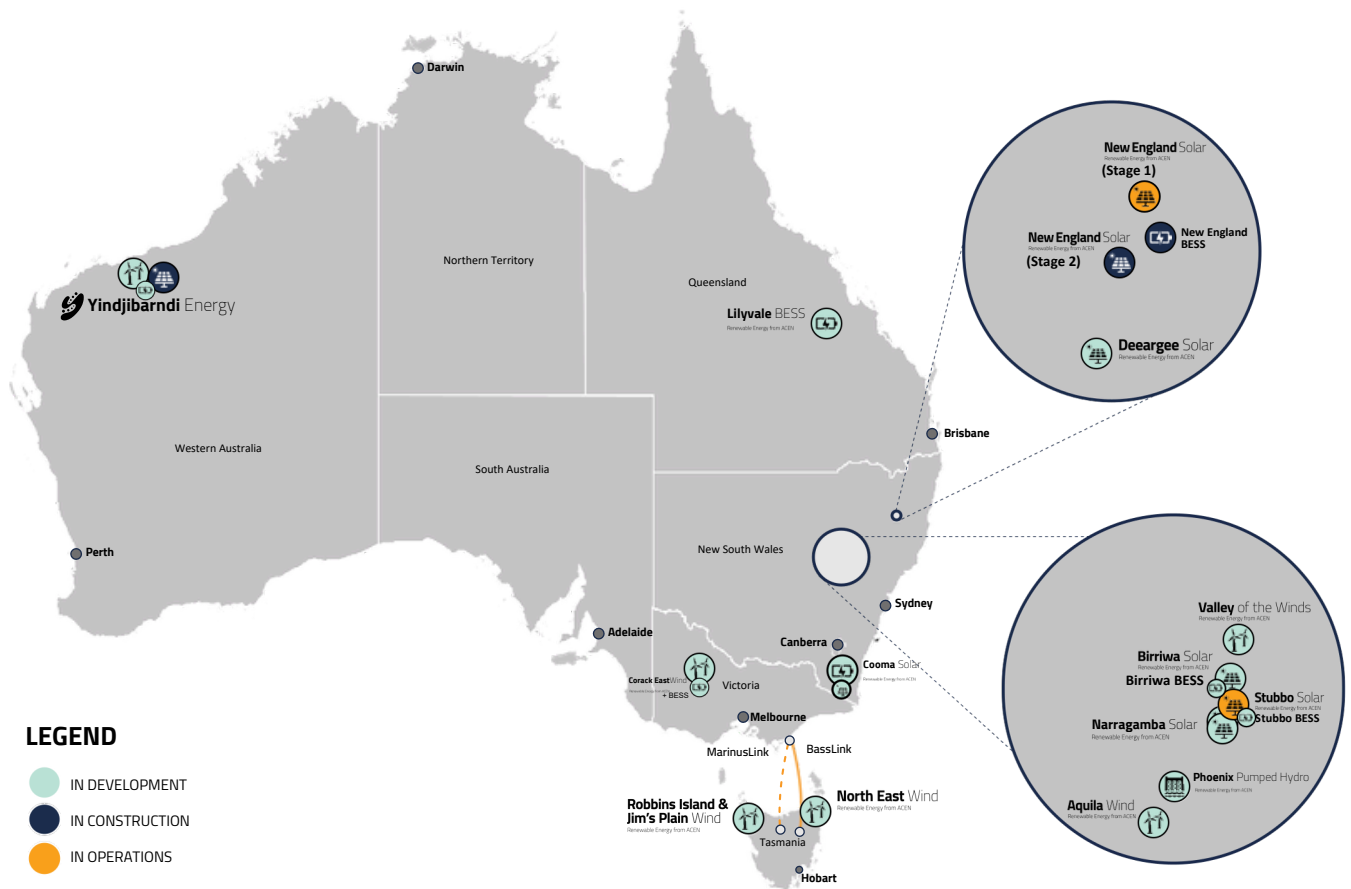

With more than 1 GW of operating
capacity today and more than 13
GW of solar, wind, battery, and
pumped hydro projects in the
development pipeline, we are
well-positioned to accelerate
Australia's clean energy transition.

At ACEN Australia, we believe
successful renewable energy
projects are built in partnership
with local communities. We are
committed to fostering lasting
community benefits, supporting
regional economies and
developing renewable energy
projects responsibly to help build
a more sustainable future.

Our projects

PEOPLE

In this together

We care about what we do, how we do it, and genuinely care about each other.

COMMUNITY

Long-term partners

We want to make a collaborative, enduring and positive contribution in communities where we work.

ENVIRONMENT

Proactive stewards

We are all stewards of the future and have a responsibility now to minimise our overall impact on the natural environment in everything we do.

INDUSTRY EXCELLENCE

A force for positive change

We are pushing boundaries of traditional industry thinking and pioneering modern energy needs. We want to make a positive and enduring impact.
